

Meeting Agenda - Week 5

Date:

2017-05-03

Chair:

Anne Keller

Participants:

Kevin Brunström, Joakim Mattson, Anne Keller, Sanjin Slavnic

1. Objectives (5 min). Resolve any issues preventing the team to continue.

The main issue is to get our Wizard up and running, when that is sorted we have a good base to continue.

2. Reports (15 min) from previous meeting

We have more clear of how to work with Fragments and Activities.

We still need to optimize our UC's.

Wizard GUI is semi-designed. Some work still remains to be done.

The textrecognizer is implemented and works.

3. Discussion items (35 min)

The wizard must be done this week, we must make sure that we work concentrated to get it sorted.

We need to look through our UC's together to make sure that they are up to date.

4. Outcomes and assignments (5 min)

For the Thursday meeting with Adam we need to make sure to ask Adam about the meeting structure and discuss how we should handle class communication.

We will all work together on the wizard to finalize it this week.

5. Wrap up

Next meeting will be on Thursday after our meeting with Adam.
