

Meeting Agenda - Week 3 - Meeting 1

Date:

03-04-2017

Chair:

Joakim Mattsson

Participants:

Joakim Mattsson, Sanjin Slavnic, Kevin Brunström, Anne Keller

1. Objectives (5 min). Resolve any issues preventing the team to continue.

We presented our domain model and received a lot of feedback we had to take in consideration. Today's mission is to complete the model and remake our Use Cases.

2. Reports (15 min) from previous meeting

We have drawn all the possible functionality our Use Cases will depend upon. We've also got a few sketches of our GUI and color scheme.

As for last week we had on as a task to sketch our Domain Model but because of the feedback we can not mark it as complete thus we do need to re-do it.

We do have an idea about how to handle the categories.

3. Discussion items (35 min)

The next thing we need to do is to rebuild the domain model from the review we got on our presentation. Add a couple of classes and make them work together in a better way.

After we've finished the Domain Model we need to redo all of our Use Cases as they no longer reflect our program and the functions we want to include.

We also need to do digital sketches of our GUI so we all are on the same page on what the program will look like.

4. Outcomes and assignments (5 min)

- Joakim will sketch a new model
- Sanjin and Anne is remaking and creating the Use Cases we need.
- Kevin will take care of sketching all the different views in Balsamiq.

5. Wrap up

Finishing the last Use Cases and start coding.

Next meeting will be on Wednesday this week.
