

# Meeting Agenda - Week 3 - Meeting 2

**Date:**

05-04-2017

**Chair:**

Sanjin Slavnic

**Participants:**

Joakim Mattsson, Sanjin Slavnic, Kevin Brunström, Anne Keller

**1. Objectives (5 min). Resolve any issues preventing the team to continue.**

We need to finalize our last UC so we can start coding. This is our main priority.

Thereafter we need to make an UML Sequence Map of our most important UC.

**2. Reports (15 min) from previous meeting**

We have remade our Domain Model and have got positive feedback on it. We can now start working based on this model.

Most of the Use Cases are complete and we just have to just finish the last one.

The GUI design mostly finished, we do have mockups of everything and they are all attached to the RAD.

**3. Discussion items (35 min)**

We need to make sure that we all agree on how the profile part of the program will look and thereafter finish of the UC, this is the only part of the process that keeps us from start coding.

Then we can see what code we need to write and then delegate the different tasks between us.

**4. Outcomes and assignments (5 min)**

We will all help each other and make sure that we do get the last UC done.

This is the last formal school week before spring break, but we will most likely see each other during the break and do some coding.

## **5. Wrap up**

Our next meeting will be after the spring break, week 17, we will start the week with a meeting during Monday the 24th of April.
